

THE ASSOCIATION AV SPECIALISTS

Staging association meetings is very different to the standard corporate event.

Associations need technicians who can deal calmly and competently with diverse presenters. Systems and processes that can deal with every type of visual media imaginable, often at a moment's notice.

The ability to design an AV spec that fits your association's budget, because registration and sponsorship funding are a finite resource. Associations need fair pricing with no unforeseen fees or add-ons.

Scene Change are Australia's association AV specialists, working both direct and through the country's leading PCO's. Large and small, local and international. We staged a meeting last year with 943 speakers. We apply the same enthusiasm to the smallest gathering.

Our work has been recognised in winning the Meeting & Events Australia National Award for Best Technical Production Company for the last two years. Talk to us now to find out why.
